Software Engineering student at Afeka College, specializing in AI, with 1.5 years left until graduation. I love solving problems and building software that helps people in the real world. A great example of this is CityScan, a platform I'm developing to help municipalities manage data and report hazards more easily. I've built a functional Full-Stack demo using React and Node.js to show exactly how the system works, turning the initial idea into a simple and easy-to-use application.

Education

2023 – Present – B.Sc. Software Engineering, Afeka College of Engineering, current GPA: 87.
2015 – 2018 – Full Matriculation Diploma, Leo Baeck Education Center
- 5 units in Mathematics and English, advanced studies in Chemistry and Geography.

Personal projects

CityScan | React, Node.js, TypeScript, MongoDB, Python | [\[Live Demo\]](#) | [\[GitHub\]](#)
ToDo App (Task Management) | React, TypeScript, Vite | [\[Live Demo\]](#) | [\[GitHub\]](#)

Academic projects

Cyber Security Course | React, Node.js, Supabase, Python | [\[GitHub\]](#)
2048 Game Clone | C, Linux/Ubuntu | [\[GitHub\]](#)

Employment

2021 – 2023 – Security Shift Manager, Haifa Port and Passenger Terminal.

Military Service

Mar 2021 – Jul 2021 – Career Service, Operational Mobility School

- Combat soldier and instructor.

May 2019 – Mar 2021 – Commander and instructor of off-road and armored vehicles

Jul 2018 – May 2019 – Unit training.

- Instructed on off-road and armored vehicles during day and night, under complex terrain conditions, identifying and solving vehicle malfunctions in real time under pressure
- Operated night vision systems during training and missions
- Worked under pressure in demanding situations requiring quick decision-making
- Gained experience in public speaking, technical instruction, and teamwork
- Demonstrated leadership skills and the ability to guide and manage others

Skills & Languages

- **Front-End:** React, TypeScript, JavaScript, HTML5, CSS3, Responsive Web Design.
- **Back-End & Databases:** Node.js, Python, Java, C, PostgreSQL, MongoDB (NoSQL).
- **Tools & OS:** Git, Ubuntu (Linux), Cursor, Claude (AI-Assisted Development).
- **Core CS:** Algorithms, Data Structures, OOP, Operating Systems.
- **Languages:** - Hebrew :Native - English : Very Good
